

UČNI NAČRT PREDMETA / COURSE SYLLABUS	
Predmet:	Komunikacijska omrežja naslednje generacije
Course title:	Future Communication Networks

Študijski program in stopnja Study programme and level	Modul Module	Letnik Academic year	Semester Semester
Informacijske in komunikacijske tehnologije, 2. stopnja	Komunikacijske tehnologije	1	2
Information and Communication Technologies, 2 <sup>nd</sup> cycle	Communication Technologies	1	2

Vrsta predmeta / Course type	Izbirni / Elective
------------------------------	--------------------

Univerzitetna koda predmeta / University course code:	IKT2-635
---	----------

Predavanja Lectures	Seminar Seminar	Sem. vaje Tutorial	Lab. vaje Laboratory work	Druge oblike	Samost. delo Individ. work	ECTS
15	15			15	105	5

\*Navedena porazdelitev ur velja, če je vpisanih vsaj 15 študentov. Drugače se obseg izvedbe kontaktnih ur sorazmerno zmanjša in prenese v samostojno delo. / This distribution of hours is valid if at least 15 students are enrolled. Otherwise the contact hours are linearly reduced and transferred to individual work.

Nosilec predmeta / Lecturer:	Prof. dr. Aleš Švigelj
------------------------------	------------------------

Jeziki / Languages:	Predavanja / Lectures: slovenščina, angleščina / Slovenian, English
	Vaje / Tutorial:

#### Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Zaključen študijski program prve stopnje s področja naravoslovja, tehnične ali računalništva.

#### Prerequisites:

Student must complete first-cycle study programmes in natural sciences, technical disciplines or computer science.

#### Vsebina:

Uvod: Prihodnja heterogena omrežja.  
Prenos govora prek IP (VoIP):  
H.323 in sorodni protokoli, RTP, SIP, MGCP and Megaco / H.248  
Arhitektura NGN (Next Generation Network):  
dostava večpredstavnostnih storitev v paketnih omrežjih, medijski prehod, krmilnik medijskega prehoda, signalizacijski prehod  
Multimedijiški podsistem IP (IMS):  
arhitektura in koncepti, krmilna ravnina seje, podatkovna ravnina, storitve, IMS v mobilnih okoljih, IMS v fiksnih omrežjih  
Upravljanje z mobilnostjo:  
horizontalna predaja zveze, vertikalna predaja zveze.

#### Content (Syllabus outline):

Introduction:  
future heterogeneous networks  
Voice over IP (VoIP)  
H.323 and related protocols, RTP, SIP, MGCP and Megaco / H.248  
NGN (Next Generation Network) Architecture:  
multimedia services delivery over packet networks, media gateway, media gateway controller, signalling gateway  
IMS (IP Multimedia Subsystem):  
architecture and concepts, session control plane, media plane, services, IMS in the mobile environment, IMS in the wire line environment  
Mobility management  
horizontal handover, vertical handover

**Temeljna literatura in viri / Readings:**

Izbrana poglavja iz naslednjih knjig: / Selected chapters from the following books:

- T. Plevyak, V. Sahin, *Next Generation Telecommunications Networks, Services, and Management*, Wiley-IEEE Press, 2010. ISBN 978-0-470-57528-4
- D. Grace, M. Mohorcic, *Broadband Communications via High-Altitude Platforms*, Wiley, 2010, ISBN 978-0-470-69445-9
- J. H. Ortiz, (ed.), *Telecommunications networks : current status and future trends*, Rijeka: InTech, cop. 2012. ISBN 978-953-51-0341-7
- M. Poikselka, A. Niemi, H. Khartabil, G. Mayer, *The IMS: IP Multimedia Concepts and Services*, Third Edition John Willey & Sons, 2009. ISBN 978-0-470-72196-4
- A. B. Johnston, *SIP understanding the Session Initiation Protocol*, 3rd edition, Artech House, 2009. ISBN 978-1607839958

**Cilji in kompetence:**

Cilj predmeta je seznaniti študente s koncepti prihodnjih heterogenih omrežij, ki bodo temeljila na IP protokolu.

Podana bo arhitektura in značilnosti bodočih omrežij s poudarkom na uporabljenih protokolih in konvergenci.

Kompetence študenta bodo po uspešno opravljenem predmetu obsegale sposobnost upravljanja s komunikacijskimi omrežji naslednje generacije.

**Objectives and competences:**

The objective of this course is to acquaint students with future heterogeneous networks, which will base on IP protocol.

In particular the architecture and characteristics of future networks will be given with the emphasis on protocols and convergence.

The competencies of the students completing this course successfully will include the ability to manage future communication networks.

**Predvideni študijski rezultati:**

Študenti bodo z uspešno opravljenimi obveznostmi tega predmeta pridobili:

- poznavanje značilnosti bodočih heterogenih omrežij
- znanje o protokolih, ki se uporabljajo v heterogenih omrežjih
- razumevanje protokolov za zagotavljanje večpredstavnostnih vsebin preko paketnih omrežij
- poznavanje problematike konvergencije telekomunikacijskih omrežij

**Intended learning outcomes:**

Students successfully completing this course will acquire:

- knowledge of characteristics of future heterogeneous networks
- knowledge of protocols which are used in heterogeneous networks
- understanding of protocols for delivery of Multimedia Services over packet networks
- understanding the convergence of telecommunications networks

**Metode poučevanja in učenja:**

Predavanja, seminar, konzultacije, individualno delo

**Learning and teaching methods:**

Lectures, seminar, consultancy, individual work

Delež (v %) /

**Načini ocenjevanja:**

Weight (in %)

**Assessment:**

Seminarska naloga	50 %	Seminar work
Ustni zagovor seminarske naloge	50 %	Oral defense of seminar work
